WORK EXPERIENCE

Product Designer — SSTech System Solutions, Ahmedabad Gujarat,

May 2025 – Present

IT Consulting & Product-Based Company

- Collaborated with stakeholders and cross-functional teams to align design strategy with core product goals, user needs, and business objectives across multiple active products.
- Designed and delivered end-to-end digital products from ideation to final UI delivery covering user flows, wireframes, interactive prototypes, and high-fidelity visual designs.
- Built and maintained a scalable enterprise design system in Figma, ensuring 100% visual consistency across all modules and significantly reducing development handoff time.
- Worked closely with developers to ensure design feasibility and maintained a clear Figma component library to streamline implementation and reduce rework cycles.
- Mentored junior UI/UX designers and established structured design review processes to maintain high-quality standards across all project deliverables.
- Redesigned legacy product interfaces to improve functionality, aesthetics, and usability, resulting in measurably improved user satisfaction and project outcomes.

Sr. UI/UX Designer — Fablo Platform, Indore (M.P.)

Sep 2023 – Jan 2025

IT Product & Services Company — Proprietary Platform + Client Solutions

- Translated complex client and business requirements into intuitive wireframes, interactive prototypes, and high-fidelity visual designs for web and mobile platforms.
- Redesigned legacy product modules to enhance usability and functionality, significantly boosting user retention and improving task completion rates across the platform.
- Stayed current with emerging UI/UX trends and tools, continuously optimizing platform experiences for modern target audiences and evolving user expectations.
- Contributed to reusable UI component documentation to support consistent and scalable product development across teams.

IT Services Company

- Collaborated with clients to understand project requirements and delivered end-to-end wireframes and UI designs customized to target audiences and business goals.
- Managed visual branding by designing high-converting social media graphics, digital posters, banners, and logos to strengthen brand visibility and user engagement.
- Developed consistent visual design language across client projects, ensuring cohesive brand identity and polished user experiences.

KEY PROJECTS

Brownway Pty Ltd — Smart Logistics Delivery Platform (Australia)

Figma · Mobile App Design · UX Design · Design System · Logistics Operations

- Designed a smart logistics mobile application from scratch for Import, Export, and Metro delivery operations, transforming complex field workflows into a clean, high-fidelity UI in Figma.
- Created an intuitive Smart Waiting Time Billing user flow that auto-captures timestamps at pickup and drop locations, enabling real-time, accurate billing without manual input.
- Designed the Job & Vehicle Assignment system, empowering drivers to independently select and release vehicles without dispatcher calls improving field autonomy and reducing delays.
- Architected the UX framework for Offline Mode Support, designing intuitive offline alerts, pending sync states, and local data limitation flows for drivers in remote, low-connectivity areas.
- Built a comprehensive visual language and scalable design system (color, typography, grid, component effects) optimized for rough on-field usage conditions.
- Collaborated with project managers and developers to test end-to-end delivery flows from job assignment to final invoice generation, validating design feasibility throughout.

SSTech HRMS — Enterprise UX Modernization

Figma · Enterprise Product Design · Design Systems · Multi-Persona UX

- Leading end-to-end UX modernization of a legacy HRMS platform, transforming the interface into a high-performance enterprise product with optimized dashboard clarity and navigation.
- Designed a multi-persona KRA & Performance Management module with customizable review cycles (Monthly/Quarterly/Yearly) for HR managers, Company Admins, and Super Admins.
- Designed the Employee Engagement suite, including Employee Surveys, Exit Form modules, and a dedicated Learning Management System (LMS) / Upskilling module.
- Strategizing and designing third-party ecosystem integrations (MS Teams & Jira) to create a unified workspace for seamless cross-platform collaboration within the HRMS.
- Building a scalable Enterprise Design System in Figma for 100% visual consistency across complex, data-heavy reporting and administrative modules.

Wallet — Daily Expense Tracker Mobile App

Figma · Mobile UX · Data Visualization · User Research · Fintech Solution

- Spearheaded core mobile app redesign and user flow optimization scaling the active user base **5x** from **40,000 to 2,00,000+** downloads on across platforms(App & Play Store).
- Conducted user research and feedback analysis to identify pain points, validate new feature ideas, and guide iterative design enhancements.
- Designed intuitive data visualizations (charts, graphs, expense reports) in Figma to simplify complex financial tracking for everyday users.
- Delivered full design artifact suite wireframes, interactive prototypes, and high-fidelity UI designs tested and refined before development handoff.
- Collaborated with developers and the product owner to ensure seamless implementation, consistent UI components, and scalable design updates across releases.

SSTech System Solutions — Website Redesign

Figma · Web Design · UX Research · SEO-Focused Design · Enterprise Solution

- Leading full website redesign to modernize digital presence and optimize the user journey, targeting a 5x increase in user engagement and improved SEO performance.
- Conducted user research, user interviews, and competitor analysis to identify usability gaps and restructure the information architecture for clarity and conversion.
- Designed fully responsive, high-fidelity interfaces across all device sizes, maintaining strict WCAG accessibility standards and smooth navigation.
- Optimized CTA placements and landing page layouts to transform the website into a high-converting lead generation tool for the sales team.
