

Akash Chourasiya

Product Designer | UI/UX Designer | Design System

WORK EXPERIENCE

SStech System Solutions, Ahmedabad

05/2025– Present

Product Designer

Roles & Responsibilities:

- Collaborated with stakeholders and cross-functional teams to align design strategy with core product goals and user needs.
- Designed and delivered end-to-end digital products from ideation to final UI delivery, improving overall product usability and user satisfaction metrics.
- Created user flows, wireframes, prototypes, and visual designs to define intuitive and scalable product experiences.
- Worked closely with developers to ensure design feasibility, streamlining the implementation phase and cutting down rework by maintaining a clear component library.
- Built and maintained a scalable design system in Figma, reducing development handoff time and maintaining **100%** visual consistency across modules.
- Mentored junior UI/UX designers and established structured design reviews to maintain high-quality standards across all project deliverables.
- Redesigned and extended design concepts to enhance functionality and aesthetics, resulting in improved project outcomes and user satisfaction.

Fablo Platform, Indore (M.P)

09/2023 – 01/2025

Sr. UI/UX Designer

Roles & Responsibilities:

- Collaborated with clients to translate complex business requirements into intuitive wireframes, interactive prototypes, and high-fidelity visual designs.
- Redesigned legacy product modules to enhance functionality, which significantly boosted user retention and improved task completion rates.
- Maintained up-to-date knowledge of emerging UI/UX trends and tools to continuously optimize platforms for modern target audiences.

Maitretech Solution, Bhopal

08/2022 – 07/2023

UI/UX & Graphic Designer

- Collaborated with clients to understand project requirements, creating end-to-end wireframes and UI designs customized specifically to the target audience.
- Managed visual branding by designing high converting social media graphics, posters, banners, and logos to increase brand visibility.

Indore (M.P.)

CURRENT PROJECTS

Wallet: Daily Expense Tracker

05/2025 – Present

Project Overview: A personal finance mobile application designed to help users track daily expenses, manage budgets, and visualize their spending habits seamlessly.

- Created features like expense categorization, transaction history, and analytics dashboards for clear insights into spending habits.
- Implemented smart reminders and intuitive UI to make personal finance management easy and accessible for all users.

Key Responsibilities and Achievements:

- Spearheaded the core mobile app redesign and user flow optimization, successfully scaling the active user base by **5x** from **10K** to **50K+** users post launch.
 - Conducting user research and feedback analysis to identify pain points, validate new ideas, and guide feature enhancements.
 - Designed clean, user-centered data visualizations (charts, graphs, and expense reports) in Figma to simplify complex financial tracking.
 - Creating wireframes, prototypes, and high-fidelity designs in Figma to test and refine user experiences before development.
 - Collaborating with developers and product owner to ensure seamless implementation, consistent UI components, and scalable design updates.
-

SSTech HRMS (Human Resource Management System)

10/2025 – Present

- **Project Overview:** A comprehensive UI/UX modernization of a legacy HRMS platform, focused on upgrading the visual identity and introducing new enterprise modules including KRA/Performance Management, Employee Surveys, Exit Forms, and Learning Management Systems (LMS).

Key Responsibilities and Achievements:

- Led the end-to-end UX modernization to transform the legacy interface into a high performance platform, focusing on home screen layout optimization and dashboard clarity.
- Designed a multi persona KRA & Performance module with Customized cycles (Monthly/Quarterly/Yearly) for HR, company Admin, and Super Admin roles.
- Design and developed the "Employee Engagement" suite, featuring Employee Surveys, Exit Form modules, and a dedicated Learning/Upscaling Skills module.
- Strategizing and designing third party ecosystem integrations (MS Teams & Jira) to create a unified workspace for seamless cross-platform collaboration.
- Building a scalable Enterprise Design System in Figma to ensure 100% visual consistency across complex data heavy reporting and administrative modules.

CURRENT PROJECTS

Brownway Pty Ltd Australia

02/2026 - 06/2026

Project Overview: A smart logistics delivery platform that handles Import, Export, and Metro deliveries and our focused on improving driver workflows, vehicle allocation, waiting time billing, and offline delivery management for field operations.

Key Responsibilities and Achievements:

- Designed the mobile application from scratch, turning complex logistics and operational problems into clean, high fidelity UI designs in Figma.
 - Created an intuitive "Smart Waiting Time Billing" user flow that captures timestamps automatically at pickup and drop locations for real-time accurate billing.
 - Designed the "Job & Vehicle Assignment" system, allowing drivers to select and release vehicles easily without needing dispatcher calls.
 - Designed the UX framework for "Offline Mode Support" creating intuitive alerts, pending sync states, and local data limitation flows for drivers operating in remote areas.
 - Built a comprehensive visual language and scalable design system (including color palettes, typography, grids, and effects) optimized for rough, on-field conditions.
 - Collaborated closely with project managers and developers to test end-to-end delivery flows from job assignment to final invoice generation.
-

SSTech System Website Designing

08/2025 - 06/2026

Project Overview: Redesigning the official SSTech System Solutions website to give it a fresh, modern look aligned with the latest design trends focusing on improving usability, user engagement, and SEO performance while strengthening the brand's digital presence.

Key Responsibilities and Achievements:

- Leading the end to end website redesign to optimize the user journey, targeting a **5x** increase in user engagement and continuous improvement in SEO performance.
- Conducting thorough user research, user interviews, and competitor analysis to identify usability gaps and restructure the information architecture.
- Building and maintaining a scalable design system in Figma to ensure 100% visual consistency and reduce front-end development handoff time.
- Designing fully responsive, high fidelity interfaces across all devices, maintaining strict accessibility standards and smooth navigation.
- Optimized Call to Action (CTA) placements and landing page layouts to transform the website into a high-converting lead generation tool for the sales team.
